It is my intention to submit to your Excellency on January 1, 1927, a supplemental report, in which will be set out certain needed amendments to our Insurance Laws. It will also contain an exhaustive review of the fire insurance rate situation, with recommendations concerning it for the consideration of the General Assembly of 1927.

I would particularly urge that thought be given to the re-arrangement and re-codification of the Insurance Laws. A competent commission should be named to do this work. I do not know of anything that is more badly needed now.

FIRE INSURANCE RATES

The matter of increased fire insurance rates has been uppermost recently and there has been held a public hearing, which was attended by representatives of the Southeastern Underwriters Association, fire insurance companies and the public. The Insurance Commissioner, assisted by Hon. Frank Nash, Assistant Attorney-General, examined officials of the Southeastern Underwriters Association, the organization that fixes fire rates in the southeastern territory, officials of several of our North Carolina Fire Insurance Companies and prominent fire insurance agents, including Col. Walker Taylor, of Wilmington, and Col. Jas. R. Young, of Raleigh. The Raleigh Merchants Association was represented by its executive secretary, Mr. John Bikle, and by its attorneys, General Albert C. Cox and Mr. M. L. Gordon. Following the hearing, the Insurance Commissioner and Assistant Attorney General Nash, issued the following statement:

"As there seems to be among the public a false impression as to the statutory authority of the Insurance Commissioner to deal with rates fixed by the Southeastern Underwriters Association, it is necessary in the first instance to state in reality his authority.

"Article 13, chapter 106, of the Consolidated Statutes of 1919, states in full the authority of the Insurance Commissioner. Section 6390 requires that every insurance association or bureau and every insurance company doing business in the State shall file with the Insurance Commissioner, whenever he may call therefor, any and every schedule of rates or such other information concerning such rates as may be suggested, approved or made by any rating organization for the purposes stated in Section 6388. The Insurance Commissioner is given authority upon complaint of any person aggrieved by alleged discriminatory rates, to have a hearing upon the question of discrimination between risks within the State of essentially the same hazard. If, upon such investigation, the Insurance Commissioner should determine that the discrimination exists, he is authorized to require that such discrimination be removed. Any person, firm or corporation aggrieved by any rating of an insurance company, bureau or association may file a complaint in writing with the Insurance Commissioner, stating in detail the grounds upon which the complainant asks relief. The Commissioner shall set a time not earlier than seven days after date of notice, and a place for a hearing of the complaint. After due hearing the Commissioner shall make a finding as to whether the established rate is excessive or unfair and shall make such recommendation as he deems advisable. The findings and recommendations in each case shall be made a matter of record and shall be open to public inspection. Section 6393.

"The Southeastern Underwriters Association increased the rates in North Carolina upon certain mercantile risks 10%, and upon special hazards 25%. It is only these two classes upon which the insurance rate was increased.

"The Insurance Commissioner in pursuance of Section 6393, quoted above, gave due notice to the Southeastern Underwriters Association to appear

before him on Wednesday, June 2nd, to show cause why such increased rate is not excessive and unfair. In addition to this notice to this Association he invited all the citizens of the State interested in the hearing to appear before him at that time, and to make such objections as they might have to this increase. In pursuance of the notice, Mr. Raine, Secretary of the Southeastern Underwriters Association, appeared at the time and place fixed by the Commissioner. In addition to Mr. Raine, there also appeared certain insurance agents in the State and officers of local companies, General Albert L. Cox and Mr. M. L. Gordon, attorneys, representing the Raleigh Merchants Association, and Mr. N. H. McLeod, president, and Mr. John G. Bikle, executive secretary, of the Raleigh Merchants Association.

"After full and complete hearing and consideration of the matter the Insurance Commissioner arrived at the conclusion hereinafter stated.

"The statement as introduced by the Southeastern Underwriters Association, justifying the increase of these rates, was as follows:

Earned premiums in North Carolina.....	\$42,684,181.00
Incurred losses	26,107,951.00
Ratio of incurred losses to the premium earned	61.20%
Expense incurred	43.21%

"It is manifest from this statement that for each \$100 received in the State of North Carolina the companies interested were paying out \$104.41. The records as made in the Insurance Department throughout the five-year period, with which the figures set out above dealt, showed the following:

	<i>Premiums Received</i>	<i>Losses Paid</i>	<i>Per Cent Losses Paid to Premiums</i>
1925	\$10,209,394	\$5,673,320	55.6
1924	9,306,770	5,145,484	55.3
1923	9,018,422	4,714,809	52.3
1922	7,687,726	4,710,939	61.3
1921	7,780,170	5,454,661	70.1
21-25	\$44,002,482	\$25,699,213	58.4

"If, therefore, we add to this statement of the Department the proportion of the expense ratio as given above by the Southeastern Underwriters Association it makes a total of 101.6%. Stated in plain terms, according to this statement, for each \$100 received in the State of North Carolina, companies would be paying out \$101.60. The discrepancy between the two accounts arises from the fact that the Insurance Department has made no deduction for unearned premiums. The Southeastern Underwriters Association did make this deduction. We will return to this subject a little later, and for the present will assume that the statement of receipts and losses as appearing in the records of the Insurance Department is correct. The only matter then investigated by the Insurance Commissioner at this hearing was whether or not the statement by the Association of the expenses of doing business was correct; that is whether the percentage basis set up by them of 43.21% was correct. The analysis of these expenses as presented to the Insurance Commissioner was based upon a distribution of expenses incurred by the companies throughout the United States. This analysis was as follows:

Agents	20 %
Special Agents	6.95
Inspection Surveys	2.72
Taxes	3.84
Home Office (Includes travelling, stamps, telephone and other incidental expenses, including salaries)	9.70

"The percentage is, of course, based solely upon the gross amount of earned premiums. If it had been based upon the gross amount of premiums received it would have been appreciably less.

"All of these items of expenses are reported by the individual insurance companies under the laws of North Carolina to the Insurance Commissioner. These reports are made under oath and each one of them is minutely itemized so as to show actual items of expense in doing business in North Carolina. These reports to the Insurance Commissioner show that in North Carolina only the average expense ratio to premiums earned for the year 1925 was 47.6%. This statement is also based, not upon premium receipts, but upon the total amount of premiums earned in the State of North Carolina. It would, of course, be less if based distinctly upon premiums received. The effect also of taking the earned premiums as the basis of the calculation is to charge up against that sum all the expenses of collecting the gross premiums received by the company, and to that extent there would be some reduction of the percentage of expenses as stated by the Association. It would be unfair to charge the total expenses of collecting only to the earned premiums, because those expenses were incurred as well in collecting the gross premium receipts.

"After giving, however, due allowance to all of these criticisms of the method of stating the expenses of the companies, we think that instead of having any profit there was an actual loss in the State of \$1.61 on each one hundred dollars taken in in gross premium receipts. This appears from applying the expense incurred in the statement of the Association, that is, 43.21%, to the average loss ratio during that period of 58.4% as arrived at by the Insurance Commissioner from sworn reports in his office. These reports are necessarily correct. It is claimed, however, by the Southeastern Underwriters Association that the ratio of expense incurred in North Carolina was higher than the general ratio as stated throughout the Southeastern territory, that the expense incurred in North Carolina was in reality 46% of the amount of premiums earned.

"It appeared in the evidence, and we have no reason to doubt that it was correct, that the mercantile business, to which was applied 10% increase, showed an actual loss of 10% over the five-year period. The representative of the Southeastern Underwriters Association testified that any movement taken by the merchants to decrease the fire risks would be met by them when it showed results, by a reduction of this differential at any rate, if not its total abrogation. The increased rate does not apply to mercantile establishments and fire-proof buildings where proper sprinkling system is installed. The ordinary rate for such unprotected property is about 75c in certain towns; 10% added would make it 82½c, and as stated, to install a proper sprinkler system would entitle them to a rate of about 25c, and there would be no step-up on this rate in consequence of the 10% increase. In other words, the increase in both instances, that is the 10% increase on mercantile establishments and the 25% increase on special hazards would tend to bring about a better system of fire protection, both for the benefit

of the property owner and for the companies themselves. Under the rates established previous to the recent advance, these particular classes of property were insured at a loss to the companies and were not paying their proper proportion of the insurance cost in the State of North Carolina.

"After deliberate consideration of the matter in all its aspects we have come to the conclusion that the increased rates, as promulgated by the Association, are justified by conditions existing in the State of North Carolina."

It is imperative, in my opinion, that our Insurance Laws be so amended as to require insurance companies and rate-making organizations to file with the Insurance Commissioner schedules of increased rates and the figures upon which they are based, before said rates go into effect. We should also require all companies operating in the State to file a report showing ratio of losses to premiums and of expense to premiums, for North Carolina only.

CONCLUSION

The insurance companies,, associations and fraternal orders operating in the State and their agents, almost without exception, have shown the finest spirit of cooperation during the past year and have given me and my deputies loyal support in our work. In concluding this report I desire to acknowledge with my sincere thanks this splendid service. The newspapers of the State have been uniformly generous with their space and have supported the Insurance Department's campaigns for the prevention of accidents and fires with real enthusiasm. For this, also, I am truly grateful.

I also desire to express my gratitude to the law enforcement officers throughout the State, who have rendered valuable assistance, and to my office and field force for their splendid loyalty and their faithful work during the year.

Respectfully submitted,

Insurance Commissioner.
